

# TOURING SAFETY PROTOCOLS

## A SAFE & WARM WELCOME:

We will conduct tour check-in procedures and pre-trip health screenings to offer guests a safe start and peace of mind throughout the journey. This includes proof of vaccination for all guests. See our complete Health & Safety Pre-Trip Screening Instructions on our website for full details.

## BLENDING CULTURAL PROXIMITY WITH SOCIAL DISTANCE:

There may be times on tour or on the motorcoach when social distancing is required. We will take care in assuring any local guidelines are followed in a safe and comfortable way for our guests. For any cases where masks are required due to local guidelines, we ask that guests bring their own approved N95 (FFP2) masks for their own comfort and safety. Our wireless listening technology enables safe distances between our guests and other travelers during excursions.

## FOCUS ON GUEST AND TEAM-MEMBER HEALTH:

To ensure a healthy environment for each of our guests and our team, our Tour Directors, Local Hosts, and motorcoach drivers are fully vaccinated, and we are also requiring that all travelers are fully vaccinated before joining our trips through February, 2023. From March 1, 2023 onward, we are no longer requiring vaccination as a condition of travel, but ask all guests to adhere to airline and/or destination requirements, as they may still apply. Additionally, we will conduct regular guest health checks, and, when required by local guidelines, masks will be worn by our guests and by our team when accompanying guests. In all other cases, masks are optional for guests.

## TOUCHING HEARTS, NOT HANDS:

Traveling with the Globus family of brands removes many of the “touch points” of travel, including luggage handling, check in/check out interaction, expedited entry into attractions and more. We are further reducing risk with hands-free services, including some self-services now performed by staff, including the elimination of self-service buffet meals in some cases. We will also ensure hand sanitizing is available throughout each trip, on coach, and in hotels.

## COMMITMENT TO CLEAN:

As a part of our commitment to clean, we are requiring enhanced cleaning procedures with our hotel partners, on our motorcoaches, vehicles, and throughout every trip, including additional daily disinfecting procedures that go above and beyond our already strict health and safety procedures. And our motorcoaches are equipped with air filters that clean the air as well as provide constant ventilation.

## PARTNERS IN DISCOVERY AND IN HEALTH:

The Globus family of brands has strict health and safety protocols, which have been in place for years, focused on ensuring all aspects of our operation—from vehicles and equipment used on trip to excursions and hotel procedures. This process will continue with new, elevated health and safety checks, to maintain our promise that each touch-point of our tours and cruises are considered in our commitment to guest and team-member well-being.
