

## Discounted COVID-19 tests

Testing has become an important part of the jigsaw to resume international travel and is likely to remain in place for some time. As our company is a ABTA member we are pleased that ABTA has welcomed five new testing providers into its partnership scheme, with exclusive discounts.

The new testing Partners offer a wide range of services, from postal tests to home visits catering for the luxury markets.

We nor ABTA endorse or approve any testing provider. These companies have agreed to offer discounted testing to ABTA member clients, confirmed their inclusion on the Government's provider list and undergone standard business checks.

All the wording in each individual company description has been supplied by the testing Partner and not by ABTA. The prices are based on the Partner's lowest price PCR test.

Below are four different providers that offer testing services at a discount for ABTA members:

# RANDOX
